

SQUIGGLE BOT

- 1:Place a two inch piece of tape on each of three markers.
- 2:Tape each marker equal distance around the inside of the cup with caps facing out of the cup.
- 3:Take your pipe cleaner pieces and shape them into a half circle.
- 4:Stick the pipe cleaners into the cut slots in your cup to act as “arms”.
- 5:Peel off the top of the double sided tape on the top of your cup.
- 6:Place the motor on the top of the tape, so that the end is hanging off the end of the tape.
- 7:Secure the blue wire to the tape by pressing it down.
- 8:Place the battery positive (+) side up directly on top of the exposed part of the blue wire.
- 9:Peel off the backs of the googly eyes and stick them on the cup in the desired location.
- 10:Use a piece of tape to secure the exposed part of the red wire to the top of the battery.
- 11:Take off the caps from the markers then place it on a blank piece of paper and watch it go!
