

## Toothbrush Robot Instructions:

- 1.Peel off the top layer of tape.
- 2.Place motor on top of tape with wires facing the uncut edge of the toothbrush head.\*Make sure the rotating head hangs off the end of the tape and can move freely.
- 3.Place the blue wire in the middle of the tape.
- 4.Place battery + side up on top of the wire so the end of wire touches the battery.
- 5.Twist the pipe cleaners together in their center and stick them between the motor and battery.
- 6.Peel off the protective layer on the eyes. Stick eyes to the toothbrush bot.
- 7.Tuck end of red wire into pipe cleaners so the end of the red wire touches battery.
